AN ELECTRONIC BATTLEGROUND THAT TRANSPORTS YOU
INTO AN EXCITING NEW WORLD OF SIGHT, SOUND AND ENERGY.

TAKE THE CONTROLS AND ESCAPE INTO A TOTAL ENVIRONMENT OF EXCITEMENT. DISCS OF TRON: AN ELECTRIFYING NEW STRUGGLE FOR SURVIVAL.

The futuristic adventures of Tron continue in this challenging new video game based on the popular feature film created by Walt Disney Productions. DISCS OF TRON offers a unique new "Total Environment Cabinet" that allows players to experience added realism as they instantly become a part of the TRON world, battling as the video warrior Tron against Sark, the destructive defender of the Master Control Program. Exceptional sound acoustics, lighting and special effects in an enclosed environment enhance the game's challenges.

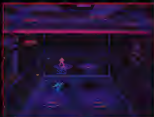

Cabinet ceiling has been cut away to show interior.

USE YOUR DEFLECT POWER

Sark is armed with 3 additional deadly weapons that can ultimately destroy Tron—chasers, super-chasers and energy pellets. Tron can escape being "derezzed" by using his special deflect power.

Both Sark and Tron have access to 3 discs at any one time. Tron can rely on 7 deflects for each new life and the appearance of each new Sark.

TAKE AIM AND PREPARE FOR DEADLIER CHALLENGES!

Aim your discs by positioning the target mark on the wall in order to hit Sark. Both Tron and Sark can bank shots off all sides of the arena. In order to move onto the next level of challenge, Tron must "derezz" Sark twice. There are 12 levels that increase in difficulty. After the 6th level, the rings move up and down, creating a full dimensional combat situation, allowing players to throw discs anywhere in the arena.

A DEADLY ORBIT OF DISCS

Step into the arena and the game begins! You must attempt to destroy Sark by using your most powerful weapons—the Discs of Tron. Both characters are positioned on rings in the arena. As the battle unfolds, the levels of difficulty increase. Tron and Sark can leap across the various rings to escape danger and take aim to "derezz" the opponent. But if Tron gets too close to the ring's edge, he could lose his balance and fall off!

CONTROL FEATURES:

- Control grip moves Tron in all directions. Players must squeeze the trigger to shoot discs.
- Deflect button allows player to deflect Sark's discs and chasers.
- Rotary knob positions target mark along arena walls to aim discs at Sark or his weapons.
